

Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate and answer sheet once you have attended the full seminar.

Designing For Space - Optimised Plumbing Solutions

Proudly supported by

- 1. Explain how the use of single pipe sewage systems can help save internal space.
- 2. What impact does the current minimalist design trend have on available space?
- 3. When aiming to save space, how important is it to explore innovative solutions early in the design process?
- 4. In terms of plumbing, how can specifiers ensure their projects are adaptable and suitable for future uses?
- Explain how the installation of siphonic rainwater systems can help declutter the external design of a building.

By the end of this session you should understand:

· Explain the importance of space saving in the current architectural context

Outline the factors and strategies involved in 'future proofing' buildings

- · Identify various modern plumbing and drainage systems and explain how they differ from traditional products
- Identify design strategies that can be used to maximise bathroom and living space

Competency Codes: PC18, PC25, PC33

1 Formal CPD point
