

Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate and answer sheet once you have attended the full seminar.

The Changing Face Of Educational Design

Proudly supported by

- 1. Name two types of changes that are happening with new builds in the education sector?
- 2. Name two design elements that are important for architects to consider when designing a school?
- 3. Name two design elements that are important for architects to consider when designing a university?
- 4. Name two emerging trends in educational design that are redefining how students and educators interact with space?
- 5. How can design support neurodiversity and inclusivity in educational settings?
- 6. Identify two ways in which educational facilities are being reimagined as community hubs or multiuse spaces?

By the end of this presentation, you should be able to:

- Outline the key features of contemporary educational design and they ways they differ from traditional projects of this type.
- · Identify the challenges associated with these design changes.
- · Explain the ways that architects and designers can effectively address these challenges.
- · Identify techniques and materials that can help architects and designers create educational facilities in which students and their teachers can flourish.
