

The Value of EPDs in Construction

Proudly supported by

1. What are Environmental Product Declarations (EPDs)?
2. EPDs are becoming more important in today's world. Why is this?
3. What is meant by the term 'lifecycle assessment' and how does this concept relate to EPDs?
4. Name the five stages of lifecycle assessment.
5. How has the Australian EPD format changed recently and why?
6. How do specifiers use EPDs on projects? How do we know what matters the most?

At the end of this panel, attendees will be able to:

- Explain what Environmental Product Declarations (EPDs) are
- Outline the relationship between a Lifecycle Assessment (LCA) and an EPD
- Identify the organisation that administers EPDs in Australia and New Zealand
- Outline the benefits, for specifiers, of seeking out products that carry EPDs
