

## 1 Formal CPD point

Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate and answer sheet once you have attended the full seminar.

## INVIGORATING INFRASTRUCTURE WITH DYNAMIC LIGHTING

- 1. What is meant by the term 'dynamic lighting' and how does it differ from traditional lighting?
- 2. In what sorts of projects is this sort of dynamic lighting typically used?
- 3. Name two benefits of dynamic lighting
- 4. Is dynamic lighting becoming more commonplace?
- 5. Is dynamic lighting mainly used in new projects or can it just as easily used to reinvigorate existing sites?
- 6. What are the regulations associated with the use of dynamic lighting in infrastructure projects?

At the end of this panel, attendees will be able to:

- Outline the ways lighting systems are typically incorporated into infrastructure projects
- Explain the ways dynamic lighting can be used to enhance existing assets
- Outline the regulations and standards that apply to the use of dynamic lighting in infrastructure projects - Identify design challenges associated with projects of this type along with the best ways to overcome them
