

Considered Bathroom Design for an Ageing Population

1. Name three of the five most common conditions affecting Australians aged 65+?
2. What are the main impacts of ageing in the context of bathroom design?
3. What are the risks of poor vision in the bathroom?
4. Name three bathroom design solutions that support muscle and bone mass loss in older people.
5. How can grab handrails improve older peoples' experiences in the bathroom?
6. How can good storage improve usability and comfort in the bathroom for older people?

At the end of this panel, attendees will be able to:

- Identify general considerations associated with bathroom design for aged care and ageing in place contexts
- Explain aspects of ageing that influence how you design a bathroom for older people
- Outline key principles and considerations of aged care residential design
- Outline design guidelines that can improve older people's experience of using bathrooms
