1 Formal CPD point

Please be aware you are required to manage your own CPD records. We will provide you with your participation certificate and answer sheet once you have attended the full seminar.

Specifying Fireplaces in Commercial Projects

Proudly supported by

escea.

1. What sorts of commercial applications are fireplaces best suited to?
2. Name two key considerations associated with integrating fireplaces into commercial buildings.
3. Why is flue design important when specifying fireplaces in commercial settings?
4. What is meant by the term 'ventilation pathway' in the context of commercial fireplaces?
5. What are the fuel options for fireplaces in commercial settings?

By the end of this presentation, you should be able to:

- Identify the key technical challenges faced when specifying fireplaces in commercial buildings
- Explain how flue design, ventilation pathways and building services affect feasibility in this context
- Evaluate and compare the advantages and limitations of different fireplace fuel types across project types
- Identify strategies for integrating fireplaces into commercial architecture, safely and efficiently

Competency Codes: PC 12, PC 16, PC 28
