

The below answer sheet is for your own self-assessment.  
Please keep your completed questionnaires and answers on file for your record.  
These do not need to be sent to CPD Live. CPD-Live will send you certificate.

## MEETING ARCHITECTURAL DESIGN GOALS FOR FINISHING ALUMINIUM, WHILE REDUCING ENVIRONMENTAL IMPACTS

Proudly supported by

- 1. What are three positive qualities of aluminium as a material for construction/architectural applications?**  
Durable, Recyclable, Flexible, Light yet Strong, Efficient, Economical
- 2. Finishes have been described as 100% of the visibility of a product and what percentage of the cost?**  
One percent of the cost
- 3. What is the main role of coatings and finishes for aluminium in terms of performance?**  
Durability, protection from wear and corrosion, aesthetics, extending product lifecycle
- 4. Which piece of product documentation can assist you in determining the likely durability of an aluminium finish?**  
The warranty.
- 5. If minimising carbon emissions is your main priority, what type of finish should you choose?**  
Anodising
